**Western States Contracting Alliance (WSCA)
Master Price Agreement W5-2011
Participating Addendum – State of South Carolina**

Effective March 1, 2014 through February 28, 2017

**Facilities MRO (Material, Repair and Operating) Equipment and Supplies
Industrial Supplies & Equipment, Janitorial Supplies & Equipment**

The State of Nevada, lead state for the WSCA MRO Contract/Master Price Agreement 1862, exercised its option to renew the referenced contracts for an additional three years, effective March 1, 2014 to February 28, 2017. As a result, the State of South Carolina continues to offer the contracts established for use by all State agencies, political subdivisions, and higher and technical education institutions of the State of South Carolina for this same period. Entities shall use these contracts as they would a Statewide Term Contract, although use is not mandatory (therefore 10% Rule will not apply). The Agreement is a multiple award, catalog-wide agreement involving the three largest suppliers of MRO products as below.

Exclusions: The State of South Carolina's Participating Addendum excludes the purchase of Lamps and Ballasts; Paper Towels, Toilet Paper and Dispensers; and Trash Can Liners, as there are Statewide Term Contracts for the purchase of these specific items. Please note that the Statewide Term Contracts for these product exclusions may require a minimum quantity order and/or may not meet a particular or exceptional operational need of a using organization (Examples: can liner that is exceptionally thick/strong or of an unusual color or size, paper products that will not fit a particular dispenser). In such situations, using organizations may use this agreement to complete purchases to meet their specific operational needs.
